

## Nutrition Materials

Thank you to all the local agencies that submitted nutrition education handouts for the State WIC website. Some of those handouts are currently posted under [Local Agencies](#), then Nutrition Information under the various topic areas, and we will continue to add more. The module created for distance education, Toddler Nutrition Education, can be located by participants under [Families](#) and then Distance Education. The questions for follow-up for this module are located under [Local Agencies](#), then Resources and Follow-up Questions for Distance Learning. There is also a list of websites that may be useful for education and websites that offer nutrition handouts for purchase under [Local Agencies](#), then Resources and Links.

Please feel free to continue to submit any handouts that you feel are helpful for participant education, and we will post them as approved.
